Foreword

On 6 December 2000 The Queen Elizabeth II Great Court was formally opened and The British Museum made one of the most significant advances in its distinguished history. The Great Court has transformed the physical experience of visiting one of the most popular museums in the world by opening up the lost courtyard at the heart of the Museum’s Grade I listed building. The £100 million millennium project with new galleries and visitor facilities is the culmination of six years’ work, and has been made possible by generous support from the Millennium Commission, the Heritage Lottery Fund, the Weston Family and many individuals and organisations.

Designed by Foster and Partners, the Great Court has set The British Museum on a path of refurbishment and renewal which, with the Wellcome Gallery and King’s Library, will lead on to the 250th anniversary of the Museum in 2003. Since its foundation by Act of Parliament in 1753, The British Museum has been committed to the preservation of and research on the great collections in its care, and their presentation for the ‘studious and the curious’.

Today, the curious among our 5 million visitors can explore the heritage of Korea in the Korea Foundation Gallery, the diversity and richness of a continent in the new Sainsbury African Galleries, or make personal discoveries at the special exhibitions in the Joseph Hotung Great Court Gallery. The more studious can enjoy the activities provided in the Clore Education Centre, visit our on-line learning resources on compass or delve deeper into cultural history by using the Hamlyn Library in the magnificently restored Reading Room.

None of this would have been possible without the vision of my fellow Trustees, the talent and dedication of the Museum staff and our many supporters. On behalf of The British Museum and the nation, I thank them all.

Graham Greene cbe
Chairman of the Trustees
The Great Court

The British Museum took more than 30 years to build; the Great Court was built in 30 months and without the Museum being closed to the public for a single day. Opening up what was for over a century a hidden courtyard, the Great Court concourse acts as a focal point of the Museum. At the centre of a new north-south route through Bloomsbury, London’s cultural quarter, it now provides a spectacular square for London.

At every turn the vistas of the Great Court present a successful marriage of architectural styles. Spanning old and new, the glass and steel roof linking the surrounding facades with the Reading Room dome represents a technological wonder, in which each pane is different, achieved through the genius of Foster and Partners and the engineers Buro Happold.

The creation of the Joseph Hotung Great Court Gallery has provided a flexible special exhibitions area, whilst the stunning new Sainsbury African Galleries have brought together over 600 items from one of the best collections of African art in the world. Equally importantly the Clore Education Centre and the Ford Centre for Young Visitors have transformed the Museum’s ability to cater for educational groups in term time and holidays, offering a far wider range of talks, courses, events and conferences.

At the centre of the concourse, the historic Reading Room has been painstakingly restored, using 25 kilometres of sheets of gold-leaf, and over 2 tonnes of paint. It now contains the Walter and Leonore Annenberg Information Centre, with terminals for compass, the database of thousands of objects in the Museum’s collections, and the Hamlyn Library, a public access library for adults and children containing books specially chosen to complement compass. The Reading Room – once the preserve of a few – is open to all who wish to find out more about the Museum’s great collections.
‘Let thy feet
millenniums hence,
stand in midst of
knowledge’
Alfred, Lord Tennyson

Right: the Museum has extended opening hours to include two evenings every week.

Openness and participation

Welcoming all visitors
The Great Court has transformed the physical experience of visiting The British Museum. It provides a place for rest and reflection and a central point in which to find cafés and shops, information and orientation.

Visitors can enter from the north as well as the south and explore the Museum following the signs from the concourse. By the creation of a single level for the main floor and the installation of additional lifts all areas of display can now be independently accessed by people with physical impairments.

An entirely new range of audio and visit guides provides support for those who want to explore on their own. Visitors seeking further assistance can take one of many Highlights or eyeOpeners tours available every day, or use the new Hamlyn Library to pursue their enquiries in the Annenberg Information Centre.

The running of the Great Court is achieved with the commitment of staff who are working in new ways. All front-of-house staff in galleries and information services are now part of the Department of Visitor Services and wear distinctive corporate clothing. Electronic signage, new ticketing and back-of-house systems ensure that details of What’s On in the Museum are readily available to visitors.

With longer opening hours, regular platform performances and large-scale festival events, the Great Court is a new cultural plaza encouraging people to return at different seasons and times of the day.

The Ford Centre for Young Visitors provides a dedicated facility for the thousands of school children and students visiting in groups during term time or with their families during weekends and holidays. Its distinctive vaulting and rough brick finish provide a welcoming environment in which to prepare for the visit to the galleries or settle for a picnic lunch.
Openness and participation

Expanding display
The British Museum strives to illuminate world cultures past and present. This is achieved through the reach of the collections and Museum expertise in permanent display as well as through special exhibitions. Two new permanent galleries have significantly advanced the presentation of cultures past and present.

Displaying Africa
Occupying a space of 850 square metres and divided into five principal areas, the Sainsbury African Galleries provide a substantial and permanent exhibition space for some 600 objects drawn from one of the finest collections of African art and artefacts in the world.

The galleries were opened on 3 March 2001 by the distinguished naturalist and Museum Trustee Sir David Attenborough in the presence of the Sainsbury family and guest of honour His Majesty the Nyimi of the Bakuba from Central Africa.

The displays span archaeological origins and contemporary cultures from northern to sub-Saharan Africa, and by using the main materials of textiles, ceramics, metalwork and wood explore the common cultural approaches and forms of the Continent reflecting the diversity of artistic achievement.

Highlights include the magnificent brass head of a Yoruba ruler from Ife in Nigeria, Afro-Portuguese ivories of the 15th and 16th centuries, Asante goldwork from Ghana and a new setting for the corpus of Benin bronzes.

The galleries, developed by lead Curator Dr Nigel Barley and designed by Geoff Pickup of The British Museum Design Office, were widely praised for their boldness and simplicity.

Understanding Korea
As Korea has become a major player in the world economy, there has been a flowering of interest in its culture.

The Korea Foundation Gallery which opened at The British Museum on 8 November 2000 is part of this process.

Adjacent to the Hotung Gallery of Oriental Antiquities, the Korean Gallery explores the unique history and culture of the Korean peninsula, a pivotal area of Asia, where native Korean elements are mixed with influences from China and further west.

The gallery features art and archaeology from the Palaeolithic to the present day including stone sculpture, paintings, printed books and folk art as well as lacquerware, bronze and gold. Korea’s great ceramic heritage is particularly well represented.

The gallery, drawn together by Jane Portal of The British Museum, was made possible by the generosity of the Korea Foundation and by donations from the Museum’s first Korean patron, Dr Hahn Kwang-ho CBE.

‘This is museum display at its imaginative best’
Time Out 24 April 2001 on the Sainsbury African Galleries

Bottom: the new Sainsbury African Galleries mark a substantial advance in the presentation in Europe of Africa’s cultural diversity and artistic achievement.

Top: the Korea Foundation Gallery incorporates a sarangbang or scholar’s studio, one of only two outside Korea, designed and built by Shin Young-hoon.
Openness and participation

Electronic access
In the course of the year, The British Museum recorded a six-fold increase in the use of its web site. On-line ticketing will be introduced in the coming year when a new Netfriends membership scheme will be launched by The British Museum Friends.

At the heart of the redesigned site is Compass (Collections Multimedia Public Access System), a purpose-designed database of some 4,000 objects from the Museum’s collection with linked information and high-quality images. As more trails and special features have been added – everything from mystery objects to toys – the length of stay has increased and, in the coming year, Compass will be installed on 50 dedicated terminals within the Museum enabling visitors to chart their own visit and print out a plan.

The launch of the Museum’s Ancient Civilizations series of educational resources aimed at Key Stage 2 of the British National Curriculum and produced by the Museum’s Education Department was acclaimed for the quality of its learning outcomes and teacher support. The resources of ancientegypt.co.uk and mesopotamia.co.uk will be followed in the coming year by exploration of the ancient worlds of both India and China.

Museum beyond-walls
The British Museum continued its long tradition of support for UK museums by means of loans, ranging from a single object to sizable travelling collections. This included the exceptional loan of the Lewis Chessmen to where they were discovered on the west coast of the Isle of Lewis. Work is now in progress for the opening, in June 2002, of The Story of Money, a new gallery at the Manchester Museum, in which almost one third of its content will be a substantial long-term loan from the Department of Coins and Medals.

Touring exhibitions, such as Writing Arabic or The Popular Print in England travelled to Bristol, Durham, Exeter, Belfast, Cardiff and Glasgow, supporting the activities of museums across the nation. One hundred and twenty-five works on paper by William Blake were lent to the major Blake exhibition at Tate Britain, and, in 2001, Ancient Egypt, a special exhibition of 200 items, will open at the Birmingham Museums and Art Gallery.

Internationally, the Museum lent objects to 38 venues. The exhibitions and special displays ranged from ancient Egypt to contemporary prints. More than one million people around the world visited British Museum touring exhibitions in their own countries from Ancient Faces in New York to William Blake in Helsinki and Mummies, Death and Afterlife in Tokyo. Eternal Egypt a major exhibition of some 150 artefacts opened in Toledo, Ohio, in March 2001, and will tour to eight further venues across the US in the next two years.

More than five million people visited The British Museum in 2000 and on-line visits increased six times.
Opposite: a group of Lewis Chess pieces travelled back for local exhibition to the west coast of the Isle of Lewis where they were discovered in 1831

Learning and engagement

Exhibitions and display
Special exhibitions and temporary displays provide the means for bringing to the public new discoveries and research, for revealing areas of the collections which cannot be on permanent display and advancing techniques for design and presentation.

The major exhibitions attracted more than 120,000 people with the first exhibition in Britain on Burma: Visions from the Golden Land: Burma, and the Art of Lacquer, followed by an exploration of the art of spectacle in ancient Rome in Gladiators and Caesars, and a landmark exhibition Rembrandt the Printmaker.

A total of 25 special displays this year (see Appendix 2) covered everything from Saga – Contemporary Ceramics from the Home of Japanese Porcelain to Islamic Works on Paper: Recent Acquisitions, from Size Immaterial: handheld sculpture of the 1990s to The Prints of Jim Dine and Michael Rothenstein.

The Exhibitions Programme is a key element of the Public Programme, putting forward a wide range of public and educational events designed to reach new audiences and to ensure that an initial curiosity can extend into sustained interest.

Lifelong learning
The inaugural exhibition in the Joseph Hotung Great Court Gallery – Human Image – is an example of the links between an exhibition and the Public Programme.

In presenting the human form from the dawn of civilization to the present day and across five continents, the exhibition provided an opportunity for new perspectives on, and juxtapositions between different cultures. These were explored in a conference with contributions by the artists Sarah Lucas and Michael Clark, and a lecture series Ways of Seeing, which opened with an outstanding talk by the writer Marina Warner.
Learning and engagement

The Contemporary Arts Programme also featured a lecture by Tracy Emin, and a Sci-Art award from the Wellcome Trust, in which the artist João Penalva worked with conservation scientists.

Later in 2002 the programme will encompass reflections on the new sculpture by Anish Kapoor, commissioned by The British Museum for the Great Court, and Antony Gormley’s installation, Field, specially re-worked for the Museum.

The range of Study Days presented by the Museum covered Morocco, Afghanistan, Cleopatra, and Shah Jahan; extended opening hours have made it possible to run more evening classes in the ever-popular hieroglyph and cuneiform writing courses.

Special events for Adult Learners’ Week, Science Week, Women’s Week and Museums’ Month supported national initiatives to widen participation. Handling sessions, which are particularly important for those with visual impairments, were provided, and practical workshops included Japanese Print Making, Egyptian Dance and Creative Writing.

A joint appointment with Birkbeck College and new collaboration with the British Film Institute and the Workers Education Association have extended our range of partnerships at further- and higher-education levels. The MA degree course in the History of Print with University College London was restarted and a new Diploma in Asian Art became the first higher-level course delivered entirely by The British Museum.

Learning support
The British Museum is a major resource for learning at many different levels. Some 250,000 school children visited in the last year in educational groups, the majority studying history at Key Stage 2 (7–11 year olds). With the dedicated facilities now available in the Ford Centre for Young Visitors, the number of school groups including

Every day 14 gallery tours suited to all levels of interest are offered by trained guides
Learning and engagement

children with specific needs is also increasing.

The Education Department provides a wide range of programmes to support teachers in enriching and extending the curriculum through handling sessions, art programmes and storytelling. For example Excavating Egypt uses a handling collection, and during Science Week, Stone Age technology and animal mummies were explored.

The Aztec Market was brought alive by the Anglo-Mexican education team Mexicolore, and a Benin programme with Tony Ogogo and his fellow African artists in London helped local children to address a challenging moment in West African history.

The launch of ancientegypt.co.uk and mesopotamia.co.uk – both supported by the Japanese telecommunications company, NTT – has enabled children and families across the country to benefit from high-quality learning support.

The CD-ROM Journeys in the Roman World, produced in conjunction with Channel 4 Learning, enables children to explore ruined sites all over the Roman world with impressive simulations to make the subject of archaeology exciting and accessible.

New A-level study days in archaeology continue this commitment to developing the interest and skills needed to attract and sustain young museum professionals. Art history courses, for example those linking the classical world to the Renaissance, and Japanese art to the Impressionists, are in development.

Quality environment

The expansion of the programme has been made possible by the opening of the Clore Education Centre with its flexible seminar rooms/studios and two lecture theatres. The facility is the result of the largest-ever donation to museum education from the Clore Duffield Foundation and it has transformed the Museum’s ability to cater for differing audiences and needs.

The BP Auditorium (320 seats) was inaugurated with the first in the BP lecture series, Civilization, delivered by Nelson Mandela, whilst the inaugural conference in the Stevenson Lecture Theatre (150 seats) supported skills-sharing in marketing.

The completion of the dedicated ICT Room in the coming year will enable the development of a new range of programmes to support teachers and local groups in using on-line resources.

The major conference in March 2001 on The Learning Power of Museums and Galleries was organised with the Clore Duffield Foundation in association with The Times Education Supplement and The Times Higher Education Supplement.

The formal opening was addressed by the Rt Hon David Blunkett MP, Secretary of State for Education and Employment and the Rt Hon Alan Howarth MP, Minister for the Arts.

Stories from the Trojan Wars, a party for Eid, Korea Day and Money Week are just some of the ways in which the history and cultures of the world are brought alive in the Museum.
Above: a visually-impaired visitor exploring the specialist tools used in Japanese screen conservation as part of the Science Week programme.

Bottom: the installation of a Bedouin tent provided young people across the country with a tangible experience of the Arab World.
Learning and engagement

A reference library for all
Thanks to the generosity of Lord Hamlyn, the restoration of the former Reading Room of the British Library was marked by the opening of a new public reference library. Containing some 12,500 volumes on world cultures, the library provides an accessible resource for adults and children in an inspiring setting.

Study resources
The appointment of the David Eccles Librarian to oversee the Museum’s entire stock of some 300,000 volumes in the Central and departmental libraries is designed to ensure that the contents of these libraries and the Museum archives are more widely appreciated and used.

Departmental study rooms are open to those who seek an expert opinion on an object they have brought in, or wish to research the collections, or join one of the Museum’s object-handling sessions.

Community programmes
The Arab World programme uses a handling collection of objects and costumes, story-telling, calligraphy and dance to enrich audience understanding of Arab cultures. The presentation by Saudi Arabia of a Bedouin tent has provided a flexible and appropriate setting for the programme and has made possible a nationwide tour encompassing Merseyside, Manchester, Tyneside, Leicester, Hertford and London.

Ongoing work with Chinese communities resulted in the ‘Year of the Dragon’ tour on the Museum’s multimedia system, COMPASS, developed with the Chinese Community School in Wembley.

Planning is now well advanced for the expansion of the Families programme into London shopping centres, and for other projects with community centres and local museums in 2001.

The year 2000 has seen a major advance in the ways in which The British Museum engages with all its audiences.

Above: Chinese New Year is a highlight in the annual calendar and this year’s Chinese Moon Day will be followed in 2002 with a paper festival for half-term week.
Below: more than 13,000 people visited the departmental study rooms to pursue more specialist research or join one of the object-handling opportunities.

Above: Adults and children can consult any of the 12,500 specially acquired books in the Paul Hamlyn Library in the Reading Room.

Right: the Hidden Histories programme, a performance-based course for deaf and disabled people, was a collaboration with SHAPE and Queen Mary College, London.
Research and understanding

Presenting new research
Recent research into the composition of the paper used by Rembrandt means that many of his prints can now be dated more accurately, revealing the role of preparatory drawings and oil-sketches in his working method. By bringing together items from the two major collections of the Rijksmuseum in Amsterdam and The British Museum, Curator Dr Martin Royalton-Kisch has placed works from the same series alongside each other for the first time.

Covering the full range of subjects for which the artist is celebrated, the exhibition Rembrandt the Printmaker (supported by the Marks Charitable Trust) was highly acclaimed: 'Rembrandt... is not just a dazzling show. It allows glimpses of the intricate processes of the master’s creativity' (International Herald Tribune, March 2001).

Cleopatra VII, the Egyptian Queen, was fabled for her beauty and allure, and the exhibition Cleopatra of Egypt – From History to Myth (sponsored by BP) takes the myth as the starting point to show how her image was manipulated over time. By researching the appearance and forms of representation of Cleopatra, Curators Dr Susan Walker and Sally-Ann Ashton were able to confirm that seven previously unidentified sculptures were in fact representations of her.

During the year research has been undertaken by Dr Colin McEwan, Curator of Latin American collections, together with archaeologists and curatorial colleagues from Brazil in preparation for a major collaborative exhibition on the Unknown Amazon (sponsored by Brasilconnects). This ambitious project is redefining the prehistory of the Amazon basin, tracing the rise of tropical forest civilization in the middle and lower Amazon.

Archaeological excavation
The British Museum contributed this year to more than 30 major archaeological excavations.
Research and understanding

international and British excavations working in collaboration with academic and specialist organizations in the common goal of exploring and preserving sites of special interest.

The Museum is taking the lead role in ongoing work in Egypt, India, Italy, Jordan, Pakistan, Turkey and Turkmenistan, making significant contributions to advancing archaeological practice and understanding.

In the Autumn of 2000 spectacular discoveries were made at Merv in Turkmenistan where Dr St John Simpson worked in conjunction with the Turkmen Academy of Sciences and University College London.

The ancient city of Merv dates from the 6th century BC when it formed part of the Achaemenid Persian Empire, and excavation of the city defences has revealed the walls dating from the period of its expansion as a Greek city. The 10 metre-high wall provides proof of Greek architects applying their principles of military planning deep into Central Asia, changing the history of fortification in the region.

Excavation at Forum Novum in Italy – supported with funding from the Townley Group of The British Museum Friends – has been ongoing since 1997. In this the final year, excavation work focused on the Roman amphitheatre identified by ground-probing radar.

The arena was built in the middle of the 1st century AD and at capacity is likely to have held 2,000 people. The earth and timber build of the amphitheatre is common in the northern provinces of the Roman Empire, especially Britain, but not in the Mediterranean. Although many amphitheatres in Italy were originally built this way, they were rebuilt in stone, so the amphitheatre of Forum Novum, fossilized in earth and timber is, as far as we can tell, unique.

This exciting research was presented in the Gladiators and Caesars exhibition.

Publishing findings

The British Museum remains one of the largest museum publishers in the world putting into the public domain the expertise and findings of its scholars to a wide range of audiences.

In addition to exhibition catalogues and Occasional Papers which record symposia and research findings, the British Museum Press this year published some 58 books embracing subjects as diverse as Indigo (J Balfour-Paul) to Etruscan Civilization (S Haynes) and Vikings: Records, Memorials and Myths (G R Williams).

The catalogue for Gladiators and Caesars – an exhibition centering on the lives and practices of gladiators in the Roman era – was described as ‘quite simply, the best cultural and historical overview of the subject I have ever read’ (The Sunday Telegraph).

The catalogue accompanying the exhibition Burma and the Art of Lacquer was also the fruit of new research by Ralph Isaacs and Richard Blurton.
Preserving and understanding
Every exhibition and new gallery requires the careful preparation of each object and the creation and monitoring of appropriate environmental conditions. Creating the new Sainsbury African Galleries involved the assessment of some 600 objects ranging from delicate textiles and contemporary basket work to corroded metal.

This year the Department of Conservation completed their work on the 1,000 items excavated from the important Anglo-Saxon cemetery at Buckland in Kent. The challenge is not only to conserve the items recovered but to record and preserve the information they may contain. One of a pair of square-head brooches revealed the gilded surface hidden under copper corrosion; fragments of a green glass cone beaker were reconstructed after being lifted from a grave in a block of surrounding soil.

Ninety per cent of the recovered objects were made of metal and each was X-rayed for identification and to assess its condition. The Department of Scientific Research then undertook extensive radiography of the swords, spearheads and shield bosses, for example, in order to understand their construction, before they were cleaned. Traces of wood, fleece, textiles and leather were identified – all providing vital evidence of life and death in 6th-century Kent.

Sharing skills
The British Museum has an active commitment to developing professional skills through national and international exchange schemes, training programmes and conferences. Through the generous support of BP, the annual international fellowship programme is now in its third year. This year six colleagues from Brazil and Iran pursued a wide range of museum activities covering curatorial work, visitor services, exhibitions, education, conservation, funding, and media relations.

The Japanese Department welcomed a senior curator from the Kyoto National Museum to work with them, whilst the first of the Michael Bromberg fellowships in Prints and Drawings – designed to encourage the next generation of print scholars by providing two attachments each year – was appointed following an endowment of £100,000 from Ruth and Joseph Bromberg.

A new visitor centre at Sutton Hoo, Suffolk, is being undertaken by the National Trust in collaboration with a team of experts from The British Museum, led by Angela Evans of the Department of Medieval and Modern Europe.

All Museum departments encourage internship, volunteer work and skills exchange. Training the next generation is vitally important; the Conservation Department alone hosted 12 internships in the last year.

Expertise in conservation and scientific research provides essential underpinning to all aspects of the curatorial work of The British Museum
Opposite: photomicrographic image of the fungal threads growing on a pickled caper from an Early Bronze Age house at Tell es-Sa‘idiyeh, Jordan. Post-excavation studies by the Department of Scientific Research reveal fascinating insights into human diet of the time.

Above: sharing skills as well as objects is an integral part of the Museum’s work. Angela Evans examines an Anglo-Saxon spearhead from the National Trust excavations at Sutton Hoo, Suffolk.

Above: Careful cleaning and conservation of brooches from 6th-century graves at Buckland, Kent, revealed detailed craftsmanship and niello inlays.
Developing the collections

**Partnership in acquisition**

Acquisition and investigation seeking to extend knowledge of both past and present are vital parts of a living museum.

Major acquisitions made this year (see Appendix 3), include the Octavian gem, one of the finest works by the gem-cutter Solon; *The Red Cliff*, a hanging scroll by Go Shun founder of the Shijo school of painting in 19th-century Kyoto; a 16th-century Indian *Baburnama* manuscript (the right-hand page of a double page composition of which the Museum already held the left-hand page), and works on paper by major artists from Picasso to the Chapman Brothers.

Many of the acquisitions were the result of gifts and bequests from individuals and organizations, from donations and sponsorship. Without this support and particularly the regular contributions from The British Museum Friends, departmental support groups, and the National Art Collections Fund, The British Museum would be unable to develop the collections on behalf of future generations.

The exhibition *Visions from the Golden Land: Burma and the Art of Lacquer* was the result of a substantial gift of lacquerware from Ralph Isaacs, providing important insights into the religious and domestic activity of a distant land. The artists Zhang Qiang, Wang Dongling and Bu Leiping were amongst those who made gifts of their calligraphy work to the Department of Oriental Antiquities.

The Department of Prints and Drawings received an anonymous gift of £128,000 for modern prints and an endowment of £500,000 from the Rootstein-Hopkins Trustees for the acquisition of modern British prints and drawings. One of the many works on paper acquired this year was donated to mark the retirement of a member of staff.

Opposite: large oval agate plaque engraved with the bust of Octavian as the god Mercury, 35-25 bc. The acquisition was made possible by an award of £96,000 from the National Art Collections Fund

Above: Go Shun *The Red Cliff*, hanging scroll c. 1800. Purchased with the assistance of the Japanese Purchase Fund
Kent County Council made a gift of 850 Palaeolithic flint artefacts and an associated archive from the Swanscombe Community School site excavated in 1998.

Fieldwork in contemporary societies provides contextual information on past collections as well as the basis for future areas of research. Modern acquisitions and fieldwork also provide the material for immediate exhibition, setting the skills and preoccupations of living people alongside the great civilizations of the past. For example, the acquisition of annuraaq clothing from Igloolik resulted in the exhibition of that name in the BP Ethnography Showcase.

A collection of Japanese ephemera will provide up-to-the-minute material for the exhibition Souvenirs of Contemporary Japan, and as part of the Japan 2001 festival, these souvenirs will provide a counterpoint to the Museum’s major exhibition on Shinto: the Sacred Arts of Japan.

The British Museum Friends donated funds of more than £125,000 towards acquisitions across the spectrum of the Museum’s collections.
Public recognition

Generosity of the highest order
The Great Court was made possible because of the extraordinary generosity of individuals, trusts, foundations and corporations, the Millennium Commission and the Heritage Lottery Fund. The generosity of the Weston Family was a crucial factor in this historic development.

Sponsorship from the Ford Motor Company enabled the Museum to create the Ford Centre for Young Visitors, and the Henry Moore Foundation made a significant donation to the new Sainsbury African Galleries.

The opening of the Great Court was sponsored by Linklaters & Alliance – founding member of the corporate partners scheme – and BP, in association with The Sunday Times.

Other donations, all much appreciated, included sponsorship by BP of the Cleopatra exhibition, funding from the Horace W Goldsmith Foundation for the Access post in the Education Department, as well as support from The Times for the five major exhibitions of 2001. All such support is listed in Appendix 1.

The coming year will see the expansion of the corporate partners scheme and the development of the legacy programme as well as a major gift campaign towards further capital development.

Pledges of £6 million have already been made towards the total of £9 million needed for the complete refurbishment and restoration of the King’s Library – built to house the books of King George III – as part of the Museum’s 250th anniversary programme in 2003.

The room will display an exhibition on the intellectual world of the Enlightenment in which The British Museum was created, drawing loans from the House of Commons Library as well as the British Library, the Natural History Museum (originally parts of The British Museum) and the Science Museum.

Opposite: the colossal visage ‘Moonlight’ by Igor Mitoraj installed in the Forecourt as part of the Contemporary Arts Programme
Above: Lord Hamlyn, benefactor of the Hamlyn Library, the Museum’s public access reference library on culture and civilization
Below: The Rt Hon David Blunkett MP, Secretary of State for Education and Employment with Mr Ian McAllister CBE, Chairman of the Ford Motor Company, and children in the Ford Centre for Young Visitors
Media profile
Open Court at the British Museum, a documentary about the Great Court as a millennium project, was screened by BBC2 on 2 December 2000. The opening on 6 December attracted considerable interest from broadcast media including a feature on BBC1’s Big Draw lottery programme, extensive through-the-day television news and radio coverage. The design of the Great Court roof won Lord Foster the Award for Visual Arts in the Fifth South Bank Show Awards in February 2001.

During the year, expert comment by Museum staff was given on ITN’s News at Ten and many radio stations; exhibitions attracted a cover feature in the Sunday Times Magazine and a further leader in The Times as well as extensive reviews. Rembrandt the Printmaker was listed in the Best Exhibitions sections of several publications throughout its run, and the discoveries about Cleopatra of Egypt featured on the front page of The Sunday Times in advance of its opening.

Extending membership
A lecture by Seamus Heaney on Beowulf and evening openings were highlights in the 120 events organized for members of The British Museum Friends. In the coming year the Middle Room, adjacent to the King’s Library, will be refurbished as a Members’ Room.

The Museum records its gratitude to the 90 volunteers who support membership and Museum activities by providing handling sessions in the galleries, working with visitors, undertaking research, answering enquiries and supporting events.

Representation and appointments
Mr Graham Greene (Chairman of the Trustees), Dr Robert Anderson (Director), and Mr W Vivian Davies (Keeper of the Department of Ancient Egypt and Sudan) gave evidence to the Parliamentary Select Committee on Culture Media and Sport’s enquiry into Cultural Property: Return and Illicit Trade.

Dr Robert Anderson served on the Department for Culture, Media and Sport’s Ministerial Advisory Panel on Illicit Trade, and was part of an official British delegation which visited North Korea to mark the re-establishment by the UK Government of diplomatic relations.

Dr Andrew Oddy, Keeper of the Department of Conservation, was elected President of the International Institute for the Conservation of Historic and Artistic Works.

Dr Chris Herring, formerly of the Health Development Agency was appointed Director of Finance.

Membership of The British Museum Friends increased by 13% this year to 13,710 – the highest in its 31-year history
Above: Dr Caroline Malone, from the University of Cambridge, was appointed Keeper of the Department of Prehistory and Early Europe

Top: Volunteers from The British Museum Friends provide regular handling sessions for visitors to the HSBC Money Gallery

Bottom: Antony Griffiths, Keeper of the Department of Prints and Drawings, was elected a Fellow of the British Academy
Public recognition

Treasure
The Portable Antiquities scheme is a Government initiative to encourage the voluntary recording of all archaeological finds, whilst material that constitutes Treasure has to be reported under the Treasure Act. The British Museum provides a vital service of identification, documentation and training in conjunction with a national network of Finds Liaison Officers for both these measures. Since the Treasure Act came into force in September 1997 there has been a 15-fold increase in reported cases of Treasure across the UK from 25 a year to 373. Museums have the opportunity to acquire Treasure finds after an independent valuation, and some 146 finds have been acquired in this way by regional museums in the last year and 30 by The British Museum.

The Treasure report launched at the Museum by the Rt Hon Chris Smith MP, Secretary of State for Culture, Media and Sport, in February 2001, provided information about this work and the ways in which it is advancing understanding of little-studied areas.

One of the most important prehistoric finds of the last decade, a group of Iron Age gold jewellery, was made by a metal detectorist near Winchester. Deposited between 60 and 20 BC, the hoard comprises two gold necklaces, four brooches and two bracelets made from more than a kilogram of gold. The jewellery was probably fashioned by British craftsmen using Greek and Roman techniques to make a traditional status symbol in a new way. It therefore sheds new light on the changing nature of Britain in the years before the Roman conquest. Archaeologists from The British Museum worked closely with colleagues from the Winchester Museums Service to assess the find site and now believe the hoard was perhaps a religious offering to the gods by two important Britons – perhaps even a king or queen.

Finding Our Past, a major travelling exhibition, commencing in 2003, will highlight the work of The British Museum in the Treasure process and Portable Antiquities scheme.

Best sellers
The British Museum Company operates publishing and retailing businesses in support of the mission of The British Museum. With the opening of the Great Court, retail space on site has increased by 80%. The British Museum Company produced 150 new products – including jewellery commissioned from young British designers – to celebrate the opening of the Great Court.

The new bookshop is three times the size of the old one and now stocks one of the widest ranges of titles in the country, including archaeology, ancient history, ethnography, museology and exhibition catalogues, from The British Museum Press and other publishers.

A dedicated souvenir and guide bookshop stocks guides in nine languages.

The British Museum makes a major contribution to preserving the heritage of the country under the Treasure Act and Portable Antiquities Scheme

38 The British Museum Review 2001
Above: three curatorial departments along with Conservation and Scientific Research are involved in assessing objects under the Treasure Act.

Right: War Record robe from the Northern Plains of North America c. 1825-50 on long-term loan. The British Museum is grateful for the support provided by lenders in this way.

Below: the most important discovery of Iron Age jewellery for a decade was made at Winchester, and reported under the Treasure Act.
languages supplying visit support for the wide range of museum visitors, whilst the children’s shop provides materials suited to pocket-money budgets as well as offering a huge choice of learning support materials.

The British Museum Press combines scholarly advance with popular success in its wide-ranging list. How to Read Egyptian Hieroglyphs by Mark Collier and Bill Nanley reached the Best Sellers list, whilst Dangerous Tastes by Andrew Dalby, published as a Christmas food book, was The Guild of Food Writers Food Book of the Year.

The British Museum Traveller takes tours to sites of special interest around the world providing the opportunity to combine a holiday or study visit with Museum expertise.

On-line sales of The British Museum Company have exceeded projections. With the increased size of the business, the infrastructure has been strengthened particularly in financial and IT systems.

**Improving effectiveness**

Opening hours at the Museum have increased by 45%, with the galleries open for longer and the Great Court open late most evenings. This dramatic increase in the role of The British Museum as a civic space has been achieved within existing resources.

The recruitment of more than 100 staff to provide enhanced visitor services and infrastructure support was achieved within six months, and the Human Resources Department supported the delivery of 1,200 training days. The effectiveness of the Building Management Department was recognised in both an Energy Efficiency award and Investors in People status.

**Funding**

The British Museum is a Non-Departmental Public Body, directly funded by the British Government. It is an exempt charity under Section 2 of the Charities Act 1993 and for the year 2000–01 received a grant of £34.881 million. The three-year funding settlement for the years 2001–04 provides for increases of 3.1%, 1.4% and 0% of which in the first year £400,000 has been allocated to building maintenance projects. The value of the grant-in-aid has fallen in real terms by 30% in ten years, while at a little over £6 per visitor the cost per visitor is one of the lowest in the sector.

Forty-nine percent of museum income is now secured through commercial, sponsorship and fundraising activities. The Museum is also supported by private gifts in the form of objects for the collections, financial support for the Museum’s objectives and Trust funds.

Information on The British Museum departments, British Museum Development Trust, Friends and support groups is given in Appendix 7. The Annual Report of the Museum is laid before Parliament and can be read at www.thebritishmuseum.ac.uk/annualreport.

Outstanding acquisitions

Major financial support received towards acquisitions included £250,313 from the National Art Collections Fund and £125,337 from The British Museum Friends. Note: all dates are AD unless otherwise stated.

Ancient Egypt and Sudan

Fragment of the outer sarcophagus of Amenhotep son of Hapu, 14th century bc. Purchased with the help of the Raymond and Beverly Sackler Foundation.

The Dunrobin Sarcophagus, wooden coffin of Nesmut with cartonnage case and commemorative medal, 22nd Dynasty, about 945–715 bc; donated by the BMF.

Two fragments of linen mummy wrapping inscribed with texts from the Book of the Dead, formerly in the Zaki Todros Collection, 4th century bc; donated by the BMF.

A group of fragments of fine painted limestone relief from tombs of the 12th Dynasty (c. 1938–1795 bc) at El-Lisht, showing parts of figures, inscriptions and decorative borders.

Foot from a wooden coffin, decorated with figures of the goddesses Isis and Nephthys and inscribed with funerary texts, 20th or 21st Dynasty, 1186–1050 bc; donated by Mr Michael Cameron.

Demotic papyrus inscribed with a previously unknown hymn to the god Sobek, 1st–2nd century bc.

Major reference collection of rock-samples from Egyptian quarry site. Donated by Prof Dietrich Klemm of the University of Munich.

Ancient Near East

A stone head of South Arabian type from the Yemen, 1st–2nd century ce. Obtained in Aden between 1961–65 and bequeathed by Mrs E M Richardson.

Collection of finds from Petra, Jordan, representing a proportion of the registered small finds from the site, 3rd century bc to 2nd century ad. Presented by Peter J Parr.

The Dunrobin Sarcophagus, wooden coffin of Nesmut with cartonnage case and commemorative medal, 22nd Dynasty, about 945–715 bc; donated by the BMF.

A group of fragments of fine painted limestone relief from tombs of the 12th Dynasty (c. 1938–1795 bc) at El-Lisht, showing parts of figures, inscriptions and decorative borders.

Foot from a wooden coffin, decorated with figures of the goddesses Isis and Nephthys and inscribed with funerary texts, 20th or 21st Dynasty, 1186–1050 bc; donated by Mr Michael Cameron.

Demotic papyrus inscribed with a previously unknown hymn to the god Sobek, 1st–2nd century bc.

Major reference collection of rock-samples from Egyptian quarry site. Donated by Prof Dietrich Klemm of the University of Munich.

Ancient Near East

A stone head of South Arabian type from the Yemen, 1st–2nd century ce. Obtained in Aden between 1961–65 and bequeathed by Mrs E M Richardson.

Collection of finds from Petra, Jordan, representing a proportion of the registered small finds from the site, 3rd century bc to 2nd century ad. Presented by Peter J Parr.

Coins and Medals

Richard Tuttle, USA, medals of aluminium, copper, silver and gold in a wood and felt box entitled ‘Coins/medals’. 1996. Donated by the American Friends of the BM.

Silver short cross halfpenny minted in London by the moneyer Teger, c. 1220.

Private catalogue of tin foil impressions of a mid-18th-century German coin collection.

2 bronze coin weights used in China trade, early 19th century.

Collection of 600 20th-century children’s badges, donated by Mrs J M Mellor.

Ethnography

An ikat-dyed raffia textile, from western Madagascar, early 20th century.

Four pen and wash drawings of Native artefacts from the Northwest Coast of America, early 20th century.

A silver brooch by Bill Reid (Haida; 1920–98), donated by Mrs J B Mellor.

Greek and Roman Antiquities

Roman agon plate with the head of Octavian as the god Mercury (Iunonis Octavian), c. 35–25 bc.

Purchased with the aid of the NACF, BMF, Caryatid Fund, Ready Bequest and a private donor.

Hellenistic marble statuette of Aphrodite Euploia (Spratt’s Aphrodite), 2nd century bc. Purchased with the aid of the NACF, BMF and Caryatid Fund.

Athenian Geometric amphora, c. 830–820 bc; bequeathed by Miss M J Milner.

Roman portrait head of the Empress Livia as the goddess Ceres, c. 30–50. Purchased with the aid of the NACF, Duthie Fund and Caryatid Fund.

Roman portrait head of the Greek poet Menander, c. 150–200, purchased with the aid of the BMF and Caryatid Fund.

Etruscan bronze statuette of a woman, c. 500 bc; purchased with the aid of the BMF (Eva Lorant Bequest) and the Caryatid Fund.

Hellenistic faience head of Queen Berenike II, c. 200 bc; purchased with the aid of the Caryatid Fund.

Japanese Antiquities

Go Shun (Matsumura Czekkei (1752–1811) The Red Cliff (Sekihetsuzu), hanging scroll, ink and light colour on silk, c. 1800. Purchased with the assistance of the Japanese Purchase Fund.

Harriwa figure of a man, Kofun period (late 3rd–6th century) of low-fired clay. Purchased with the assistance of the Brooke Sewell Fund.

72 colour woodblock prints by Tajima Hiroyuki (1911–97) dating from 1960 – 93, mainly ‘Artist’s Proofs’ or ‘Bon & Tires’. Donated by Mrs Toshie Tajima.

Medieval and Modern Europe

Silver figure of a male saint or prophet, from Buntingford, Hertfordshire. Purchased with the aid of the NACF and BMF.

Cretan icon of St John the Baptist painted in egg-tempera on a wood panel. Crete, c. 1450. Gift of Miss Ella Wentworth Dyne Steel who has also donated 14 other icons and 13 Early/Middle Byzantine antiquities.

Rare oval gilt-brass astronomical compendium, signed by the watchmaker Robert Brinkin senior of London c. 1600. Anglo-Saxon 8th-century disc-headed pin, the head decorated with a uninc inscription of the first 7 letters of the Anglo-Saxon furrow, followed by out-of-sequence letters. Only 2 other Anglo-Saxon objects decorated with a furrow are known.

Ornamental Antiquities

Eight-panel screen decorated with hunting scenes in ink and colours on Korean paper. Choson Dynasty, Korea, 18th century. Hahn Kwang-ho Purchase Fund.

Persian drawing of a woman in Chinese dress. Herat (modern Afghanistan), 1400–50. Given by the NACF.

Persian painting of a man, inscribed ‘the work of Yusuf’ and ‘from the relations of Shakiy Shihab al-Din Suhravardi’; with 5 Mughal seals and inscriptions on the reverse, 15th century. Given by the NACF.

Ten-panel screen showing Koreans paying tribute to the Chinese court. Ink and colours on paper. Choson Dynasty, Korea, 19th century. Hahn Kwang-ho Purchase Fund.

Dish with thick imitation celadon glaze. Mamluk, Egypt, 15th century. Given by Prof J M Rogers FSA, FBA.

Stonevase with underglaze iron decoration of fish and lotus flowers. Punchong type, Korea, Choson Dynasty, 15th/16th century. Hahn Kwang-ho Purchase Fund.

48 The British Museum Review 2001
Large collection of 48 boxes of Late Stone Age material from archaeological excavations in Sulawesi, Indonesia. Given by the Institute of Archaeology, University of London, in agreement with the Government of Indonesia.

7 large granite slabs, sculpted with lions (4), dancing girls (2), and a fly-whisk bearer (1). 16th/17th century, Sri Lanka. Brooke Sewell Permanent Fund.

Ear-cup made of crystal. China, Han Dynasty, 206 bc – 220 ad. Given by Mr Gerard Arnhold.

51 items of Korean furniture for the gentleman’s study, sarangbang, displayed in the new Korea Gallery. Late 20th century. Given by the Korea Foundation.

Writing on the Wall sarangbang, work in mixed media on paper by the Middle Eastern artist Maliheh Afnan. Gift of the artist via Mr Gordon Barrass.

Prehistory and Early Europe

2 Hungarian Bronze Age bronze decorated shaft-hole axes, c. 1700–1400 bc, formerly Pitt-Rivers Collection. Purchased with the assistance of the NACF.

An Early Bronze Age gold ‘basket’ earring from Stogursey, Somerset.

Part of the Hawkedon Helmet, the brow guard, from Hawkedon, Suffolk, Romano-British, 1st century. Gift of Mr K W Bradnam.

Prints and Drawings

Jacob Matham (1571–1631) after Hendrick Goltzius (1558–1617), The Tabula Cebetis, 1592, engraving. Purchased with the assistance of the NACF and the Arcana Foundation.

Jean de la Chambre (1648–85), Animals at a Fountain, drawing. Purchased with the assistance of the Patrons of Old Master Drawings.

Christian Bernhard Rode (1725–97), Scipio’s Magnanimity, drawing. Purchased with the assistance of the Patrons of Old Master Drawings.

Giovanni David (1743–90), Allegory of Painting, etching. Purchased with funds from the Arcana Foundation.

Rev. Thomas Kerrich (1747–1828), Group of Five Studies of Lowestoft and Pakefield, 1794, coloured chalks on blue paper. Purchased with the assistance of the BMF.

Johann Heinrich Lips (1758–1853), The Four Times of Day, aquatint. Purchased with funds from the Arcana Foundation.

Johann Theile after Caspar David Friedrich (1774–1840), The Königsstuhl on the Island of Rügen, aquatint. Purchased with funds from the Arcana Foundation.

Adolf Hirényi Hirschl (1860–1933), Study for a Frontispiece with Damsels, Crows, Warriors and Father Time, white and black chalks. Presented by Kate Ganz.

Maurice de Vlaminck (1876–1958), Fête de Femme, c. 1906, woodcut. Purchased with funds from the Friends of Prints and Drawings.

Pablo Picasso (1881–1973), Femme Nué à la Source, 1962, linocut, 6 progressive proofs for this print. Purchased with the assistance of the NACF.

Pablo Picasso (1881–1973), Deux Femmes avec un Vase à Fleurs, 1959, linocut, printed in cream on black. Purchased with the assistance of the BMF.

Ronald Searle (b. 1920), ‘The Painter’ from The Rake’s Progress, 1954, pen and ink and wash. One of 15 drawings for the series purchased with the assistance of the BMF, the Patrons of Prints and Drawings, and Charlotte Gere. Presented by Mr and Mrs Joseph Bromberg in memory of their son Michael.

Comelia Parker (b. 1956), Poison and Antidote Drawings. Presented by the Josef and Anni Albers Foundation.

Ronald Searle (b. 1920). ‘The Painter’ from The Rake’s Progress, 1954, pen and ink and wash. One of 15 drawings for the series purchased with the assistance of the BMF, the Patrons of Prints and Drawings, and Charlotte Gere. Presented by Mr and Mrs Joseph Bromberg in memory of their son Michael.

Cornelia Parker (b. 1956), Poison and Antidote Drawings. Presented by the Josef and Anni Albers Foundation.

Jake Chapman (b. 1966) and Dinos Chapman (b. 1962), Wormy-Head and Staggereed, 2000, watercolour over etching, 2 hand-coloured plates from the portfolio of etchings Exquisite Corpse (2000).

Excavation and fieldwork

British Museum projects: international

Canada, Nunavut, collecting contemporary clothing for Annuasq exhibition. J King

Egypt, Tell el-Balamun, Director: A J Spencer

Egypt, Upper Egyptian sites, epigraphic recording. Director: W V Davies, Conservator: E Miller, Photography: J Rossiter

Ghana, collecting contemporary coffins for the Sainsbury African Galleries, N Bailey

India, Vidisha (including Sanchi, a UNESCO World heritage site), with the School of Oriental and African Studies, University of London. Directors: Drs M Willis, D Ali

Italy, Forum Novum (Tiber Valley), in collaboration with the British School at Rome, the University of Birmingham and the Soprintendenza Archeologica del Lazio. Directors: Drs P Roberts, V Gaffney, H Patterson, Conservator: H Bullock. Supported by the BMF Townley Group

Japan, fieldwork and collecting for exhibition on tourism and pilgrimage, S Pippennan

Japan, Tokyo, oriental lacquer study tour. Conservator: F Minney

Jordan, Tell es-Sa’idye, Director: J N Tubb, post-excavation: S Leach

Pakistan, Bannu Archaeological Project, with University College London, the Pakistan Heritage Society, Peshawar, and the University of Sydney. Directors: F Khan, J R Knox, K D Thomas, P Magee

Turkey, Knidos, under the auspices of the British Institute at Ankara and the University of Konya Expedition at Knidos. Director: D J Jenkins

Turkmenistan, Merv, Anglo-Turkman collaboration with University College London and the Turkmen Academy of Sciences. Directors: Drs J Simpson, G Herrmann, K Kurbansakhatov, Conservator: P Pearce

Vanuatu, fieldwork on clothing in the Pacific, L Bolton

UK projects to which the Museum has made a contribution

Buckinghamshire, excavation of Treasure find, J D Hill, Conservator: H Bullock

Devon, Exeter, Royal Albert Museum and Art Gallery, Sharing Skills Scheme, Conservator: H Taylor (host)

Hampshire, excavation of Treasure find, S P Needham, J D Hill, A J Spencer

Hull, Trinity House, Consultant Conservator: J Potter

Kent, Chiddingstone Castle, Conservators: P Pearce and H Taylor

London, Southwark, with English Heritage, Southwark Borough Council and Pre-Construct Archaeology. Consultant: Dr D Gaimster

Newcastle-upon-Tyne, North East Area Museums Service, Sharing Skills Scheme, Conservator: B Willis

Suffolk, Errolswell (Lakenheath) with Suffolk Archaeological Unit and Bury St Edmunds Museum. Consultant: A Evans, Conservator: F Shearman

Suffolk, Hoome Palaeolithic project. Director N Ashton, with S Lewis (Cheltenham and Gloucester College of Higher Education) and S Parfitt (Institute of Archaeology, London)

Suffolk, Sutton Hoa, with Suffolk Archaeological Unit and the National Trust. Consultants: L Webster, A Evans, Conservators: S Watkins, H Bullock

Suffolk, Coddenham, Suffolk Archaeological Research Unit. Conservator: M Hockey

Surrey, Post Medieval secular wall-paintings, Surrey Archaeological Society with English Heritage. Consultant: D Gaimster

International projects to which the Museum has made a contribution

Albania, Butrint, with the University of East Anglia. Director: Prof R Hodges, Conservator: P Pearce

Austria, Vienna, Museum fur Völkerunde, object selection for Unknown Amazon exhibition. Curator: C McEwan, Conservator: B Willis

Brazil, University of Sao Paolo, Museum of Archaeology and Ethnography, workshop on conservation of archaeological ceramics. Conservator: J Quinton

Brazil, Sao Paolo, selection of objects for Unknown Amazon exhibition. Curator: C McEwan, Conservators: J Quinton, B Willis

Denmark, All, Archaeological Project, with Universities of Cambridge, Durham and Southampton. Co-director: J D Hill

Egypt, Alexandria, Graeco-Roman Museum, conservation of stone objects for Cleopatra exhibition. Conservators: J Foley and K Birkholzer

Egypt, El Amarna, Egypt Exploration Society project. Director: B J Kemp

Egypt, Fayoum, with the Seven Pillars of Wisdom Trust and the British Academy. Director: D Rathbone

Egypt, Hierakonpolis with American Research Centre in Egypt (ARCE). Director: R Friedman, Conservator: E Miller

Egypt, Luxor, with the University of Cambridge Theban Tombs Project. Director: Dr N Strudwick, Conservator: B Leach. Supported by the BMF Townley Group

Egypt, Memphis, EES project. Directors: D G Jeffreys and J Malek

Egypt, Qasr Ibrim, EES project. Director: P Rose, Conservator: E Miller

Egypt, Sais, EES project. Director: D P Wilson

Italy, Troina, Sicily, Casa Solima project, with Universities of Cambridge and Catania, Sicily, and Soprintendenza Archaeologia di Enna. Directors: Drs C Malone, S Stoddart, Conservator: R Scott

Lebanon, Sidon, with the British Embassy in Lebanon, the Lebanese Directorate-General of Antiquities, the Hariri Foundation and the Lebanese British Friends of the National Museum. Director: Dr C Doumet Serhal, special adviser: Dr J E Curtis

Morocco, Volubilis, with Directors: E Fentress (excavation) and G Palumbo (site conservation/management)

Russia, Novgorod, with the Department of Archaeology, University of Bournemouth and the Institute of Archaeology, UCL. Sponsored by the EU Heritage Agency, INTAS. Directors: Dr D Gaimster, M Brisbane

South Africa, University of Pretoria, Mapungubwe Project. Director: Prof A Meyer, Conservator: M Hockey

Sudan, survey of the North Dongola Reach of the Nile including excavation at Kawa. Sudan Archaeological Research Society Project. Director: D A Welsby, Conservator: P Pearce

Sudan, epigraphy and excavation at Kurgus and Tombos, with SARS. Directors: W V Davies and I Welsby

Syria, Jerablus-Tallata, with the University of Edinburgh, the British Academy, the British Institute at Amman for Archaeology and History, and the National Museums of Scotland. Director: E J Peltenburg

USA, Boston Museum of Fine Arts, survey by T Clark of Boston Museum of Fine Arts’ early Ukiyo-e prints and books, for 2001 Japan Festival exhibition at Royal Academy; also survey of Maruyama-Shijo paintings.

Trustees also serve on the following Councils and Boards:
The British Museum Company Limited;
The British Museum Development Trust;
The British Museum Friends; The British Library

The British Museum Development Trust
Honorary President: HRH The Princess Margaret, Countess of Snowdon
Chairman: Sir Claus Moser KCB, CBE, FBA
Director: Sukie Hemming
In 1994 BMDT was given overall responsibility for securing funding for The British Museum’s Great Court Scheme and the Development Programme associated with the Museum’s 250th anniversary in 2003.
With the successful completion of the Great Court campaign, further major projects underway are the refurbishment of the King’s Library, and the Wellcome Gallery of Ethnography opening in 2003. Overall aims are to:
● broaden public awareness of the Museum’s unrivalled collections through the opening of new permanent galleries and refurbishment of existing spaces
● promote access to the collections and understanding of the processes of excavation through The British Museum Study Centre
● facilitate the creation and financing of a wide range of educational and outreach projects
● secure exhibition sponsorship
● develop The British Museum legacy campaign (launched in November 2000) to secure vital funds for the Museum’s work.

BMDT is also responsible for raising endowment funds for specific areas of the Museum’s work, including educational posts, acquisitions, conservation and scientific equipment, excavations and fieldwork.
As part of its fundraising role, BMDT hosts events including breakfasts, receptions and gala dinners. BMDT also administers the Patrons of The British Museum, a group of individuals, companies and foundations. Patrons make an annual gift of £1,500 which provides much needed support for the Museum’s key activities. Special events, receptions marking the opening of exhibitions or inauguration of new galleries and an Annual Dinner acknowledge the major part played by the Patrons.

The Museum Management Board
Directorate
Director: Dr Robert Anderson
Managing Director: Mr Suzanna Taveme
Senior Keeper: Professor John Mack

Finance
Director of Finance: Mr Chris Herring
Human Resources
Director: Mr Ian Black
Marketing and Public Affairs
Director: Dr Carol Homden

Operations
Director: Mr Chris Jones
Keepsers Committee
Dr Andrew Burnett
Assurance Manager
Mr Terry Lazenby
Secretary to the Trustees
Mr Tony Doubleley

Curatorial departments
Ancient Egypt and Sudan
Keeper: Mr Vivian Davies
The Department’s collection illustrates every aspect of ancient Egyptian and Nubian culture from the Neolithic period to the Christian period, covering a time-span of over 5,000 years from about 4000 BC to the 12th century AD. One of the largest and most comprehensive of its kind; the collection contains archaeological material from nearly 200 sites in Egypt and the Sudan, includes the world-famous Rosetta Stone and has especially outstanding holdings of funerary objects, papyri, hieroglyphic stelae, sculpture and wall-paintings. It continues to grow, largely through the acquisition of antiquities from excavations.

Ancient Near East
Keeper: Dr John Curtis
The Department covers the civilizations of the Ancient Near East and adjacent areas (Mesopotamia, Iran, the Arabian Peninsula, Anatolia, the Caucasus, parts of Central Asia, Syria, Palestine and Phoenician settlements in the western Mediterranean) from the prehistoric period until the coming of Islam in the 7th century AD. It is one of the most comprehensive collections of ancient Near Eastern material in the world. Highlights of the collection include the Assyrian sculptures from Nimrud and Nineveh, cuneiform tablets from the Royal Library at Nineveh, gold jewellery from the Royal Cemetery at Ur, the Oxus Treasure, Phoenician ivories, South Arabian sculpture, and archaeological material from ancient Palestine. At present the main thrust of the Department’s acquisition policy is to collect groups of excavated material from other excavations such as Nimrud or from current projects in countries, like Jordan, where there is still a division of finds.
Conservation
Keeper: Dr Andrew Oddy
The Department is one of the largest museum conservation facilities in the world and is fortunate in having both conservators and conservation scientists working together. The main role of the conservators is to clean, repair and restore the objects in the Museum’s collections, including those recently excavated or acquired, or in anticipation of one of the Museum’s many loans, or as part of the on-going programme to improve the condition of the study collections. Conservators who work on overseas excavations each year are an important part of our cultural diplomacy as the conserved objects are usually destined for a local museum.

The conservation scientists investigate the mechanisms by which objects deteriorate, identifying methods for stabilisation and preservation, solving problems which occur during conservation work, and investigating and selecting materials for use in conservation processes. They are also involved with achieving the best possible environmental conditions and levels of illumination so that ongoing deterioration is minimised in display and storage areas. The Department also manages the Museum’s Facsimile Service.

Education Department
Head of Department: Mr John Reeve
The Education Department aims to make the Museum more accessible to its varied audiences by providing advice, teaching and learning resources to specific target groups, as well as contributing in other ways to the visitor experience. The needs of children, students and teachers from schools, colleges and universities are partly met by providing training, resources and advice for the teachers themselves. Direct teaching and hands-on workshops for selected groups are increasingly provided, including special programmes connected to exhibitions. The lifelong learning programme includes gallery talks, lectures and films, as well as study days and other courses. The Education Department trains the professional guides and the volunteer guides. Outreach includes the Arab World programme and work by the Access, Science, Family and Primary Education Officers.

The Service also has an important input internally into the planning of galleries and exhibitions, and it contributes publications to BMP, and advises them on educational publishing. Staff are involved with museum training courses at other institutions.

Ethnography
Keeper: Dr Brian Durrans
The Department interprets ways of life of past and contemporary people worldwide. Its collections largely derive from indigenous communities in Africa, Oceania, Asia, the Americas and parts of Europe, and from a number of more complex states, and includes important archaeological material from the Americas and parts of Oceania and Africa. Many of the collections are the finest in the world. The most notable strengths are: metalwork, in particular the Benin bronzes; ivories from West Africa; textiles from all continents; wood sculpture from West and Central Africa and from Polynesia; Pre-Colombian stone and turquoise mosaic work from Meso-America; collections formed during voyages of Captains Cook and Vancouver both in the Pacific and among the peoples of the Northwest Coast of America, and the 19th-century collections from Indonesia acquired by Sir Stamford Raffles.

The Department actively acquires contemporary material in various parts of the world. In recent years field collections have been formed in all continents, often in the context of ethnographic fieldwork carried out by members of the Department’s staff.

Greek and Roman Antiquities
Keeper: Dr Dyfri Williams
The Department covers the Greek world from the beginning of the Bronze Age, Italy and Rome from the Bronze Age, and the whole of the Roman Empire except Britain until the Edict of Milan (AD 313), with pagan survivals later. The Museum holds one of the most comprehensive collections of classical antiquities in the world, with few significant gaps. It is notable for Greek architectural sculpture, in particular from the Parthenon in Athens and two of the Seven Wonders of the World – the Mausoleum at Halicarnassus and the Temple of Artemis at Ephesus. The collections of ancient jewellery and bronzes, Greek vases and Roman glass and silver are especially important.

Japanese Antiquities
Keeper: Mr Victor Harris
For the pre-20th century, the collection of decorative arts is among the finest in the Western world, while for paintings and prints the collection is pre-eminent within Europe, both in scope and quality. Archaeological material includes pottery of several millennia and tomb goods from the Kofun period, 5th-6th centuries AD. Important antiquities not represented in other European collections are being acquired wherever possible, often from Japanese sources. The foundation of a collection of dated bronzes mostly of the 17th-19th centuries, poorly represented in other museums, has been laid down over the past five years with a small number of significant acquisitions continuing to be made in the UK. For the 20th century, the graphics collection has been brought in the last 15 years from almost nothing to comprehensive holdings, the Japanese Galleries proving the stimulus for gifts from Japan of calligraphy, painting and ceramics. Continuing field trips have resulted in further gifts, mainly of 20th-century ceramics, calligraphy and prints.
Oriental Antiquities
Keeper: Mr Robert Knox
With the exception of the ancient civilisations of the Near East and the culture of Japan, the Department covers the cultures of Asia from the Neolithic period to the present day. The collections include paintings and prints from all areas as well as antiquities and sculpture. The sculpture from the Indian subcontinent forms the most comprehensive group in the West and includes the world-famous Buddhist reliefs from Amaravati. The Museum holds the richest collections of Chinese antiquities, paintings and porcelain in Europe and is also famous for its Chinese Buddhist paintings from Dunhuang in western China. In addition to the most extensive holding of Islamic pottery outside the Islamic world, the Department is well known for its medieval Islamic metalwork. The collections are being extended by the acquisition of both ancient and contemporary material through fieldwork, purchase and gift.

Prehistory and Early Europe
Keeper: Dr Caroline Malone
Wide-ranging collections encompass some two million years of human evolution and cultural change. Old Stone Age artefacts document early hunter-gatherer societies around the world. Tools, weapons and personal ornaments are enriched by a magnificent collection of miniature art. The later prehistoric material (Neolithic, Bronze Age, Iron Age) derives from the diverse agricultural communities of Europe. High points of craftsmanship are represented by fine ceramics, flintwork, gold ornaments and bronze metalwork, including Celtic art of great renown. Artefacts from Roman Britain provide a comprehensive picture of life in a Roman frontier province, ranging from mundane items to art objects and treasures owned by the wealthy. Written records identify individuals of varied ranks for the first time in Britain and reflect some personal preoccupations.

New acquisitions include high profile objects, but much importance is attached to archaeologically excavated finds, the context of which enhances both the displays and the research potential of the collections.

The Department has key statutory roles in relation to English antiquities, especially in the Treasure and Export Licensing procedures. It also supports the DCMS Portable Antiquities initiative.

Prints and Drawings
Keeper: Mr Antony Griffiths FBA
The Department houses one of the most representative collections of prints and drawings from European societies in existence. The print collection covers in a comprehensive way the development of printmaking from its beginnings in the 15th century to modern times, and includes many rare as well as artistically and historically important works. Similarly the collection of 50,000 drawings is one of the most diverse in the world, and includes works of the highest quality by most of the leading artists of the European schools from the 15th century onwards. Detailed information about the Department and the wide variety of its collections is to be found in the User’s Guide by A Griffiths and R Williams (1987).

Scientific Research
Keeper: Dr Sheridan Bowman
The Department undertakes scientific research on, and relevant to, the collections. The breadth of the scientific work reflects the diversity and wealth of the Museum’s collections. It encompasses the compositions of the objects, the technologies used in their manufacture, their provenances, dates and past environments. Well equipped laboratories are essential to the Museum’s work, and include facilities for X-radiography, scanning electron microscopy, Raman spectroscopy and radiocarbon dating. Where cost effective, time is purchased on sophisticated equipment housed in universities and other institutions, or collaborative projects are initiated with other researchers who have access to the techniques required.

The Collections Data Management Section (CDMS) is responsible for the computerisation of the records of the Museum’s collections, providing a powerful audit, management and research facility.

The Compass (Collections Multimedia Public Access System) team are responsible for the preparation of text and associated images which are made available to visitors, both on the Internet and in the new Annenberg Information Centre within the Great Court. They also assist the Museum in the development of electronic strategy and multimedia standards.

Support for Departments
Caryatids
The Caryatids is an international group, with members in Britain, America, Greece, Cyprus, Switzerland and Hong Kong, which supports the Department of Greek and Roman Antiquities through facilitating acquisitions and research.

Friends of the Ancient Near East
The Friends of the Ancient Near East support the purchase of antiquities, books, and the general running costs of the Department of the Ancient Near East.

Japanese Friends
The Japanese Friends encourage the work of the Department of Japanese Antiquities in its programme of exhibitions, research and publication, and cultural exchange activities with Japanese institutions.

The Patrons of Old Master Drawings
The Patrons of Old Master Drawings is a specialist support group for the Department of Prints and Drawings. It was formed in the Spring of 1995 in order to contribute to the acquisition of Old Master Drawings.
